EDUCATION

Instituto Tecnológico Autónomo de México

B.S. in Computer Engineering — August 2022 – Expected May 2027

PROFESSIONAL EXPERIENCE

Instituto Tecnológico Autónomo de México — November 2025 – Present

Full Stack Developer

- Develop and maintain the web system for ITAM's Raúl Baillères Jr. Library, ensuring its availability, stability, and operational continuity.
- Implement and maintain full-stack features using PHP, JavaScript, HTML, CSS, and Oracle SQL.
- Manage the server environment on RHEL, including deployments, version control with Git/GitHub, and file management through WinSCP.

OPEN-SOURCE PROJECTS

OpenSCP — September 2025 – Present

Cross-platform file transfer client built with C++20 and Qt 6, supporting SFTP, SCP, FTP/FTPS, and WebDAV on macOS and Linux.

- Designed and implemented a dual-panel file management interface with local/remote navigation, history, favorites, search, drag & drop, and protocol-neutral file operations.
- Built a persistent, parallel transfer engine with pause, resume, retry, conflict handling, bandwidth limits, resumable transfers, progress monitoring, and one-way directory synchronization.
- Improved security and reliability through SSH host-key verification, OS-native credential storage, proxy and SSH jump-host support, automated testing, CI/CD with GitHub Actions, and cross-platform release packaging.

Ruston Mail — September 2026 – Present

Cross-platform Proton Mail desktop client built with Rust.

- Built a native email client integrating with Proton Mail through proton-core, supporting authentication, mailbox navigation, search, threaded email reading, composition, replies, forwarding, and message management.
- Designed a layered architecture separating mail services, application state, and UI, using Tokio for asynchronous workloads and eframe/egui for the desktop interface.
- Added automated formatting, linting, testing, and cross-platform CI for macOS and Linux.

ADDITIONAL EXPERIENCE

LUIS Z31 — June 2020 – Present

Technology YouTube channel focused on reviews, performance testing, and technical analysis of hardware, software, and peripherals.

- Collaborated with brands and content creators on technology product reviews, including hardware, software, and peripherals, through performance testing and technical analysis.
- Produced collaborative videos, organized giveaways, and participated in special events, with several videos exceeding 100,000 views.

TECHNICAL SKILLS

Programming Languages: C++, Java, Rust, Python, C#, JavaScript, TypeScript, PHP	**Frameworks & Web:** Qt, React, Next.js, HTML, CSS
Developer Tools & Systems: Git, GitHub, GitLab, GitHub Actions, CMake, Docker, Bash, Linux, RHEL	**Databases & Platforms:** Oracle SQL, Microsoft SQL Server, SQLite, Supabase, Vercel

Spoken Languages: Spanish (Native), English (B2, Cambridge First)
